

ARCHIT GUPTA

PROFESSIONAL RECOMMENDATIONS :

Agnes Wang · 1st

SVP, Compliance Analytics at HSBC

January 26, 2023, Agnes worked with Archit on the same team

With full enthusiasm on analytics area, Archit had demonstrated his capacity of technical skills, leadership and project management while working in compliance analytics team and gotten numbers of recognitions from team members and stakeholders. Right after he join HSBC, he quickly learnt the model validation work, brought in new ideas and enhance the efficiency on projects. He is open-minded and having willingness to challenge himself. He took full responsibility to ensure the projects delivery. The motivation of self-learning leads him to be a valuable asset in the workplace.

Alex Shteyman · 1st

VP GLOBAL RISK ANALYTICS/ GRA FCC at HSBC Technology & Services (USA) Inc.

December 1, 2022, Alex was senior to Archit but didn't manage Archit directly

I work with Archit for more than 2.5 years . I known him as very knowledgeable and dedicated worker. His contribution to the couple of major projects within Compliance Analytics team was extremely valuable. He perfectly perform alone and as a team player. Need to mention his advance programming and analytical skills . It was real pleasure to work with Archit considering his proficiency and interpersonal skills

Miao Tai · 1st

Vice President at HSBC

October 21, 2022, Miao was senior to Archit but didn't manage Archit directly

GCP, project management, python, Machine Learning, Transaction Monitoring AML, project documentation. Archit and I worked together on many machine learning models in the past 3 years, using python and GCP. He consistently gave 100 percent effort to the team and played a significant role as both team leader and key contributor.

He had excellent time management skills, and he was very detail oriented as well. He was very good at project documentation. Any team would be lucky to have Archit, and I couldn't recommend him more for any business looking for new talent.

Saugat Dhar · 1st

Vice President at HSBC

October 19, 2022, Saugat worked with Archit on the same team

 All LinkedIn members

I have had the opportunity to work with Archit for more than 2 years in various projects within the compliance analytics team. He has been one of the key players who helped us shape the new direction of monitoring using machine learning. He is not only highly skilled in technologies like python, GCP, ML but also compliments them with a great focus on data-quality, Model-Risk-Management and documentation which are of great importance in AML and fraud focused Transaction-Monitoring models. He is highly experienced, quick learner and demonstrates great project management capabilities. The one quality of Archit that I was very fond of was his ability to question the status-quo which in my opinion was instrumental in bringing a cultural change. I wish him good luck and hope we'll get the opportunity to work again.

Andrew He · 1st

SVP, Global Risk Analytics

September 25, 2022, Andrew managed Archit directly

All LinkedIn members

With a thorough understanding of financial crime model risk management & framework, Archit is always able to apply his strong analytical and solid programming skills to help the team build effective and efficient models. Archit is always open-minded and exploring the opportunities for process improvement, including applying the Machine learning and cloud computing technology to further enhance modeling. Taking ownership of his work, Archit is a strong team player and always willing to take an extra mile to contribute to the team success.

Thank you, Archit!

Timothy Banks

Director, Data Science at Nielsen

June 5, 2017, Timothy worked with ARCHIT in different groups

Arhit and I have worked together for the last two years, primarily around statistical programming as part of Nielsen's "Methods" group. We were part of a team that put together and executed a training programme on R for a global statistics group, which was very successful and had now been run for several cohorts. Archit is knowledgeable and experienced with R, Python, and SQL. He is particularly interested in natural language processing. Archit has a friendly, open demeanour and is a good colleague to work with. You can count on him to pull his weight in a team. If you have any questions on Archit, you are welcome to contact me.

Xiaoyu Lin · 1st

Senior Data Scientist at IQVIA

July 31, 2017, Xiaoyu worked with Archit on the same team

All LinkedIn members

I worked with Archit for more than one year on delivering R training which covered from basic to advanced topics. He is very passionate about learning new skills and always looking for optimal solutions. He is open to others' recommendations and shows great teamwork. It was sometimes tough while delivering training to a large group of people from different background for a few days, Archit always displays his professional and responsible side to us, which made the training go smoothly. It was a pleasant experience working with Archit, and wish him all the success.

Muzamil Shafeek T P · 1st

Principal Consultant - Data Insights at Infosys

April 8, 2015, Muzamil Shafeek worked with Archit on the same team

All LinkedIn members

I got couple of opportunities to work with Archit, needless to say a very smart and dedicated person. His thought process is new and unique, finds quick alternatives for the problems that take longer time to address, very quick in delivering the results too.

Have strong command over SAS, R and SQL, with good understanding of various business analysis technique including the click stream analysis which we worked together for a major retailer client.

I would say Archit will be a great addition to any organization in the field of Business Analytics and Data Science.

Chong Jie Lim · 1st

Data Professional

July 4, 2017, Chong Jie worked with Archit on the same team

All LinkedIn members

I worked closely with Archit for close to 1.5 years on business unit-wide R training and it was a pleasure working with him. He picks up new things in R very quickly, is extremely enthusiastic in good programming practice and learning new things, and he takes on a very hands-on approach to work. Archit displayed great teamwork and professionalism during the planning, preparation and delivery phases of the R training and this is extremely helpful in ensuring that the training went as planned.

Sumeet Singh · 1st

Manager - Data Scientist

All LinkedIn members

Archit is my colleague in Buy Method team, although we are working in different verticals of Methods team, am very impressed with his knowledge in R and SQL. Our team got an opportunity to learn R from Archit and his team. I must say the quality of training materials & delivering method was very good and help people with some or zero knowledge of R got benefited in many ways (am also in one of those). He is hard-working, good team player and a quick learner. I wish him all the very best for future endeavours.

Santhanakrishnan Ramabadran · 1st

Vice President - Analytics Consulting at Tiger Analytics

April 30, 2015, Santhanakrishnan was senior to Archit but didn't manage Archit directly

All LinkedIn members

Archit's a budding analyst in the analytics and data science space, with the right ingredient skills. Not averse to coding and hackathons, and a refreshingly user-centric viewpoint he has the right mix of skills - to handle, query and model data in a range of tools from SQL to SAS to R. Am sure he'd develop into a fine practitioner in this space as he gains experience. Wish him well for a bright career in this exciting new space.

Paul T. Cummings · 1st

Chief Technology Officer, Blacksmith Applications (acquired by Telus Corporation)

February 20, 2014, Paul T. was senior to Archit but didn't manage Archit directly

All LinkedIn members

Archit came to our team and quickly learned new technology that was essential for his job. We always appreciated his flexibility on assignments, professionalism and dedication to success. I recommend Archit for software engineering positions!

May Kee Chow

Senior Analyst at The Nielsen Company

October 28, 2016, May Kee worked with ARCHIT in different groups

Archit was one of the trainers for R training conducted within Nielsen. He is very dedicated and patient during the training to make sure each of the trainees gained full benefits from it. Needless to say, he is an expert in R and SQL.

Todor Todorov

VP - Data Science Methods, AC Nielsen Bulgaria

June 28, 2017

To whom it may concern,

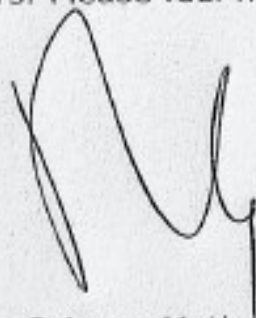

I am writing to recommend Archit Gupta as an excellent teammate with an ability to envision and achieve excellence with a diverse team environment. I worked with Archit for 2 years directly managing him in my capacity as VP, Data Science Methods at Nielsen.

Archit is methodical, thorough, and much grounded. He is particularly interested in data science and Natural Language Processing and its practical application, leading to meaningful analyses and resulting action plans. He is very skilled in R and Python, in particular, leading to him being requested to work on global programming teams inside the company as well as a trainer in a global training programme for R. He takes responsibility, delivering on time and to specification (or even beyond), yet works well inside teams, providing support to the less strong team mates. He is deeply analytical, yet knows how to pitch and build a story suitable for a non-technical audience. And finally, he pro-actively seeks new information and learning, but freely shares those leanings with his colleague at Nielsen.

Archit is a hard-working, friendly, and dedicated colleague, one that his team can count on to work as part of the team and help it achieve the goals. He is highly efficient in prioritizing his work and effectively communicating his work both verbally and in writing. His personality is such that he is not afraid to ask questions and provide his perspective on a problem.

In conclusion, I highly recommend Archit as an exceptional addition to any team, his personality and work ethics as well as his blend of hard and soft skills will be his foundation for unbounded success in the diverse environment of his future endeavours. Please feel free to contact me if I can provide any further information.

Sincere regards,

Todor Todorov
